

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	21 .10.2023
Team ID	NM2023TMID10632
Project Name	Block-chain powered library management

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

 Before you collaborate

Before you collaborate, you should have a clear understanding of the problem you are trying to solve and the goals you want to achieve. This will help you to focus your brainstorming session and ensure that you are all working towards the same objectives.

A

Team gathering

The team met to discuss implementing a blockchain-based library management system, focusing on security, transparency, and efficient record-keeping.

B

Set the goal

The goals of a blockchain-based Library Management system are to enhance transparency and security in library operations.

C

Learn how to use the facilitation tools

These facilitation tools enhance the user experience and streamline library operations.

1

Define your problem statement

To develop a blockchain-based library management system to address issues like inefficient record-keeping, authentication, interlibrary transactions, user privacy, transparency, and accountability, while ensuring integration with existing systems, scalability, and a user-friendly interface.

Key rules of brainstorming

To run a smooth and productive session

 Stay in topic.

 Encourage wild ideas.

 Defer judgment.

 Listen to others.

 Go for volume.

 If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

3

Group ideas

1. **Immutable Catalog System**: Develop a blockchain catalog for tracking library resources.
2. **Decentralized User Authentication**: Create a secure user authentication system using blockchain.
3. **Interlibrary Loan Network**: Build a blockchain network for interlibrary loans.
4. **Fine Management on Blockchain**: Manage fines and fees with blockchain automation.
5. **Transaction History Ledger**: Maintain an immutable ledger for all library transactions.
6. **Library Analytics Tool**: Develop a blockchain-based analytics tool for library data.
7. **Smart Contracts for Reservations**: Implement smart contracts for booking library resources.

Step-3: Idea Prioritization

4

Prioritize

Prioritize security, transparency, and efficient record-keeping for a blockchain-powered Library Management System.
